

Parts Cleaner

Before you start check list:

- *Are you wearing rubber gloves?*
- *Are you wearing safety glasses?*
- *Has the item to be washed been scraped clean?*
- *Is the cleaning solution going to damage the item being cleaned?*
- *Is the fusible link holding the top cover open?*
- *Is the working environment safe for you and the machine?*

Safety Rules:

- *Remember that cleaning fluids are quite often toxic and can enter your body through your skin, so always wear your rubber gloves and wash with soap and water to protect yourself.*
- *Always wear your safety glasses.*
- *Always keep open flames, or hot pieces of metal away from the parts cleaner, the fluids may be flammable.*
- *Always make sure the fusible link is being used to hold open the top cover.*
